

Liquid Rubber Industries

Liquid Rubber

Innovators in environmentally safe protective coatings

Project:	Stainless Steel Roof Sudbury, Canada
Client/End User:	Large Nickel Mine
Project Size:	33,000 ft ²
Completion Date:	Summer 2004
System Used:	Liquid Rubber Daclar™

Job Description:

Liquid Rubber Daclar™ was applied to 33,000 ft² of 30 year old corroded stainless steel roofing.

The project was completed at a nickel mine operation where corrosion is a constant problem.

Prior to Liquid Rubber being applied the facility was replacing the stainless steel roof every 6 years, at \$11.00/ft².

The Liquid Rubber Daclar™ has performed exceptionally well under this rigorous environment and has exceeded the clients expectations for both corrosion protection and waterproofing of the roof.
